System Reset

When an ERROR message appears, for example a system reset is required.

1. Press and hold for 7-10 seconds until “RST” appears.

2. Hold until the worktop reaches lowest height, rises slightly & stops.

3. Release the button. Your desk is now ready to use.

If ERROR message keeps appearing, contact ThinkingWorks for troublshooting help.

Height Adjustment

1. Press to raise the worktop.

2. Press to lower the worktop.

Programming Preset Heights

1. Adjust worktop to desired height.

2. Press followed by a number button, for example

The pressed number button is now programmed.

3. Once programmed, press preset button and the worktop will automatically travel to the preset height.

CAUTION: Once a preset button is pressed, the desk will move to the user programmed height. Ensure all device cords are appropriate length for worktop travel. There should be no obstacles in the desk’s path and the worktop should not contact any walls or objects.

Changing Displayed Height

Stix frames come pre-programmed to display the height (in cm) to the underside of the worktop. To account for different worktop thicknesses the display can be changed to display finished worktop height.

1. Lower worktop to the lowest position.

2. Press and hold — for 7-10 seconds until “RST” RST appears.

3. Press and hold M for 3-5 seconds until the display shows 600

The handset is now in “Display Reset” mode.

4. Use the + — 1 2 3 buttons to adjust the display value.

5. Press M to save display value.

6. Press and hold — until display value appears to return to normal operation.
