

Product Stewardship Policy

In line with our ongoing commitment to reducing our environmental impact, Thinking Works have in place a Product Stewardship Policy to ensure BLADE, EONA, U.R, Okidoki, Thinking Quietly, Silo and Stix are diverted from landfill.

Environmental sustainability is at the forefront of the whole Thinking Works design process. Products are designed to be easily disassembled and will either be reused, refurbished or dismantled and all individual components will be recycled. Ninety percent of the components of the table frames are recyclable.

It is the responsibility of our clients to transport the products to the Thinking Works manufacturing site at Moorebank in Sydney NSW. Please contact our Head Office to initiate the product stewardship of your product.
