

U.R

Specification Guide

U.R

Flexible, versatile and environmentally-friendly...
U.R is the smarter choice.

An environmentally considered table system, U.R draws on Life Cycle Assessments (LCA) to determine the most appropriate materials, and Finite Element Analysis (FEA) to ensure the strongest structure while eliminating waste. Skilfully designed for 100% disassembly, U.R is all ready for recycling.

Features

17 – 18

A detailed line drawing of a mechanical assembly, possibly a medical device or a specialized workbench. The drawing shows a complex arrangement of metal plates, rods, and joints. A large, dark, stylized text 'U.R' is overlaid in the center of the image. The assembly includes a horizontal plate at the top with several slots and holes, and a vertical plate below it. A central vertical rod connects these plates. To the right, there is a long horizontal rod with a small, oval-shaped component at its end. At the bottom, there is a base with a central vertical rod and a horizontal rod extending to the right. The entire assembly is shown in a perspective view.

U.R

Table Finishes

1. Frame Finishes

Standard U.R frame finishes include black or chrome legs with a polished foot. U.R is also available in our current season powdercoat colours listed, with custom colour optional.

Colours are representative only, please check with your Thinking Works consultant to view samples of any specific colour.

Steel Power/Data Beam

- a. Black Powdercoat

Powerbox Slingshot

Suitable for CN-1040 and CN-1041 table frames

Replaces U.R leg column to provide placement of powerboxes without frame interference

Made to order to cater for specified powerbox requirements and size

Provides 75mm clearance around powerbox to ensure fitment without frame interference

Power/Data Beam

Suitable for CN-1000, CN-1001 and CN-1002 frames

Suitable for CN-1010, CN-1011 and CN-1012 frames

Replaces central rail to provide placement of powerboxes without frame interference

Made to order to cater for specified powerbox requirements and size

Provides 50mm clearance around powerbox to ensure fitment without frame interference

Outrigger

Multi-leg Spacers

Provided with frame, spacers can be removed on-site to provide placement of powerboxes without frame interference

Applies to all Multi-Leg Rectangle Frames

Outriggers

Additional Outriggers can be purchased to provide adequate worktop support on odd worktop splits

Outriggers available to suit SML, MED and LRG width Multi-Leg frames

Specification

If you would like a sample set of any of our finishes, please call us on 61 (0)2 9726 7177 or e-mail at sales@thinkingw.com.

Due to our policy of continuous product development, specifications and finishes may change without prior notice.

Sustainability Policy

We realise the importance of responsible business practices and have in place numerous product and company sustainability certifications. We would encourage you to download our annual Sustainability Report from the Thinking Works website to get a full overview of our sustainability program.
