

Rosie Workstation

Specification Guide

Rosie Workstation

A modular workstation designed for productivity and collaboration.

The Rosie Workstation system, along with its modular accessories, offers the flexibility and capability to meet the needs of any office environment.

Rosie Workstation is available in three different heights and offers optional seasonal powder coat colors, making it suitable for both formal focused work areas and collaborative hotdesk setups.

Rosie Workstation

Workstation 8 – 13

Accessories 14 – 17

Rosie Workstation

Rosie Workstation Finishes

1. Standard Finishes

Rosie legs and frame, made from steel and aluminium, are available in Blanc and Noir.

2. Premium Leg Finishes

We offer premium Rosie leg finishes in our current season powder coat colours.

3. Segregated PET Cable Tray

Rosie Workstation PET cable trays are available in Light Grey and Dark Grey as standard. We can also make cable trays using customer supplied PET.

4. Segregated Cable Basket

Aside from the PET cable tray is the segregated wire cable basket which is available in Noir.

Colours are representative only, please check with your Thinking Works consultant to view samples of any specific colour.

Rosie Workstation Finishes

5. PET Screen

Rosie Workstation Screens are available in Light Grey and Dark Grey Acoustic PET panel as standard. We can also make screens using customer specified PET.

6. Upholstered Screen

a. Upholstered - Customer Supplied Fabric
Due to the technical requirements most customer supplied fabrics require PU foam.

b. Upholstered - Thinking Works recommended fabric

The unique and patented manufacturing process of Lovoc allows outstanding sustainability. To maintain the high level of sustainability, Thinking works recommends the following fabric ranges:

i. Upholstered - Woven Image Global

Woven Image's GLOBAL fabric range is low VOC certified and fire rated to AS 1530.3 and AS 3837 (Group 1 material). It can be upholstered without the need of PU foam backing whilst using 97% less adhesives than similar traditionally made screens. As a result, Lovoc screens can be made to a shorter production time. GLOBAL is available in range of 25 colours and stocked in Australia.

Colours are representative only, please check with your Thinking Works consultant to view samples of any specific colour.

Rosie Workstation Finishes

7. Upholstered Screen

ii. Upholstered - Warwick Foster

Warwick's Foster fabric range is Oeko-Tex certified; fire rated in accordance with AS1530.3; and has Halo easy-clean benefits. It can be upholstered without the use of PU foam backing whilst keeping the use of adhesives to a minimum. As a result, Lovoc screens with FOSTER fabric are not only sustainable but can also be made to a shorter production time. FOSTER is available in range of 12 colours and stocked in Australia.

iii. Upholstered - Warwick Brooklyn

Warwick's Brooklyn fabric range is also Oeko-Tex certified; fire rated in accordance with AS1530.3; and has Halo easy-clean benefits. It is another fabric range that can be upholstered without the use of PU foam backing whilst keeping the use of adhesives to a minimum. This ensures the Lovoc screen is as sustainable as possible and speeds up the manufacturing process. Brooklyn is available in a range of 14 colours and stocked in Australia.

Lovoc Screens are designed to be disassembled at the end of the product life and split up in the recycling streams of each material. This can only be achieved if the fabric is not foam backed. Please take this into consideration when specifying the fabric.

Colours are representative only, please check with your Thinking Works consultant to view samples of any specific colour.
